Professional Summary

Software developer focused on building scalable and user-friendly web applications using MERN, Java, and Python. Strong foundation in Data Structures and Algorithms, object-oriented programming, REST APIs, databases, authentication, and full-stack application development. Interested in solving real-world problems through clean, maintainable, and production-oriented software.

Technical Skills

Languages	Java, JavaScript, Python, SQL, HTML, CSS
Frontend	React.js, Next.js, Tailwind CSS, Zustand, Responsive UI
Backend	Node.js, Express.js, Java, REST APIs
Databases	MongoDB, MongoDB Atlas, SQLite
Tools & Platforms	Git, GitHub, Postman, VS Code, Vercel, Render
Core Concepts	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Authentication, JWT
Data Science	Python, NumPy, Pandas, Matplotlib, Basic Data Analysis

Projects

Real-Time Chat Application

MERN Stack

React.js, Node.js, Express.js, MongoDB, JWT, Socket.IO

- Developed a full-stack chat application with user authentication, real-time messaging, and a responsive React-based interface.
- Implemented secure authentication using JWT and protected backend routes using middleware-based authorization.
- Designed REST APIs using Express.js and integrated MongoDB for persistent user and message data.
- Structured the application using reusable React components and centralized state management for scalable frontend development.

AI Meditation Analytics Application

Python / Computer Vision

Python, MediaPipe, OpenCV, NumPy, Matplotlib

- Developed a computer-vision-based prototype for analyzing meditation sessions using smartphone camera input.
- Used MediaPipe pose landmarks to track body positions and extract shoulder-based signals for movement and breathing analysis.
- Implemented signal processing using moving-average filtering and peak detection to analyze changes in extracted signals.
- Created visualization components to inspect raw and filtered signals during real-time experimentation.

AI Life Admin OS

Full-Stack AI Application

Next.js, React, Tailwind CSS, Node.js, Express.js, MongoDB

- Designed a productivity platform concept for managing emails, subscriptions, bills, reminders, documents, and other life-admin tasks.
- Built a modern dashboard architecture using Next.js, React, Tailwind CSS, and reusable UI components.
- Implemented authentication using access tokens and HttpOnly refresh-token cookies.
- Integrated Google OAuth and Gmail APIs to connect user email workflows with the application.

Education

Bachelor of Technology (B.Tech)

2023 – 2027

Shri Ram Murti College of engineering, Bareilly / AKTU

India

Relevant Coursework

Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

Problem Solving

- Practicing Data Structures and Algorithms with a focus on pattern-based problem solving and interview preparation.
- Topics include arrays, strings, hashing, two pointers, sliding window, recursion, sorting, searching, linked lists, stacks, queues.
- Primary programming language for DSA: Java.

Additional Information

- Career Focus:** Software Engineering, Full-Stack Development, Java Backend Development, and Data Engineering / Data Science.
